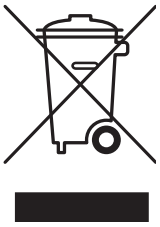
European Union Directives Conformance Statement

Hereby, Motorola Inc., declares that this H15 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/EC (the R&TTE Directive) at www.motorola.com/rtte.

Caring for the Environment by Recycling



When you see this symbol on a Motorola product, do not dispose the product with household waste.

Recycling Mobile Phones and Accessories

Do not dispose of mobile phones or electrical accessories, such as chargers or headsets, with your household waste. In some countries or regions, collection systems are set up to handle electrical and electronic waste items. Contact your regional authorities for more details. If collection systems aren't available, return unwanted mobile phones or electrical accessories to any Motorola Approved Service Centre in your region.

FCC Notice to Users

Users are not permitted to make changes or modify the device in any way. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. See-47-CFR-Sec.-15.21.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. See-47-CFR-Sec.-15.19(3).

Before you begin

See figure 1 on page 1.

Take a moment before you get started to familiarize yourself with your new H15 Bluetooth® Hands-free Headset. Along with your headset, a desktop charger is provided for both charging and storage.

Bluetooth headset

1 Call Button

2 Volume Buttons

3 Speaker

4 Multi-color Indicator light

5 Boom

Desktop charger

1 Power Indicator light

2 Headset Charging Connector

3 Charger Port

Charging your headset

See figure 2 on page 1.

You need to charge your headset using the included travel charger or desktop charger.

Charging with travel charger

The indicator light turns red when the battery is charging. It may take up to 1 minute for the indicator light to turn on. When the headset's battery is fully charged (about 2 hours), the indicator light turns green.

Note: Headset is NOT functional while charging with travel charger.

Charging with desktop charger

The desktop charger light is lit, and the headset indicator light turns red when the battery is charging. It may take up to 1 minute for the headset indicator light to turn on. When the headset's battery is fully charged (about 2 hours), the headset indicator light turns green.

Headset is functional while charging on desktop charger with the boom open. When there is an incoming call, simply take headset off the desktop : the call is automatically answered.

This product uses a lithium ion, rechargeable, non-replaceable battery.

Your battery is designed to last the life of the product. It should only be removed by a recycling facility. ANY ATTEMPT TO REMOVE OR REPLACE YOUR BATTERY WILL DAMAGE THE PRODUCT.

Quick battery check

While your headset is turned on and not on a call, you can check the battery charge level by pressing and holding both Volume buttons.

The indicator light displays charge status until you release the buttons. See below for details on indicator light and available talk time based on charge status.

Headset Indicator	Available Talk Time
Red	Less than 1 hours
Yellow	From 1 to 3 hours
Green	Greater than 3 hours

Wearing your headset

See figure 3 on page 2

Your H15 headset is supplied with multiple ear cushions. Your headset's performance is greatly dependent upon achieving a good fit on your ear. Therefore, we recommend trying all the supplied ear cushions with your headset.

The ear cushion is fitted onto the end of your headset's earpiece speaker and placed onto your ear when using your headset.

When fitting an oval-shaped ear cushion on your headset, be sure the cushion is pointing towards the microphone.

You can wear your H15 headset on your left or right ear. The headset comes ready for the right ear.

Placing the headset on your ear: **see figure 4 on page 2**
Placing the headset on the left ear: **see figure 5 on page 2**

Turning headset on and off

To turn your headset on, open the headset boom. The indicator light first flashes blue 3 times, then:

- flashes blue slowly after flashing purple/blue (if paired and connected with a phone), or
- becomes steady blue (if ready to be paired).

To turn your headset off, close the headset boom. The indicator light will turn off.

Pairing your headset

Your phone's Bluetooth feature is off by default. To use your headset, you must turn on the Bluetooth feature in your phone. Please check your phone's user's guide.

Note : The Bluetooth feature remains on until you turn the feature off.

Before you can use your headset, you must pair (link) it with your phone.

1 Ensure headset is in pairing mode

Open the headset boom to power on the headset and initiate pairing. After a few moments, the indicator light will be steadily lit in blue to indicate headset is in pairing mode.

If the headset does not enter into pairing mode, see "Troubleshooting" section.

2 Set your phone to look for your headset

- Perform a device discovery from the phone. For details about device discovery, consult your phone's user's guide. The phone lists Bluetooth devices it finds.
- Select **Motorola H15** in the list of discovered devices and confirm by following the on-screen prompts.
- When prompted by the phone, enter the passkey **0000** and confirm.

Pairing is successful when the headset indicator flashes purple and blue.

Test and use

Your phone and headset are now paired and ready to make and receive calls. To confirm they are successfully paired and operating properly, place the headset over your ear and make a call from your phone. You will hear ringing from the headset.

After you have successfully paired your phone and headset, you do **not** need to repeat these steps each time you use the headset.

To conserve power, close the boom to turn your headset off. Re-open the boom to make a call.

Using your headset with a second phone

Multipoint technology allows you to make and receive calls from 2 Bluetooth enabled devices like your personal and business phones.

1 To pair a second phone to your headset, follow these steps :

- Turn off any phones or devices that are already paired with your headset
- Turn off your headset by closing the headset boom
- Pair your headset with your second phone (as described in “Pairing your headset” section)

2 To reconnect your headset with your first phone and thus be connected to both phones :

- Turn on the first phone
- Close headset boom and then re-open it

Your headset automatically connects to both phones. Your most recently paired phone is now your primary phone for voice dial functionality.

Use the following tips when using H15’s multipoint technology :

- Incoming calls can be answered from both phones :
  - When answering a call, the idle phone is disconnected from the headset.
  - When the call ends, the idle phone is automatically reconnected to the headset.

- Last number redial dials the last outgoing call made from the primary phone.

- Voice dial is accessible from either phone via different key actions :
  - For your primary device (last paired phone), tap the Call button until you hear the tone.
  - For your secondary device (other paired phone), tap the Call button and either Volume button until you hear the tone.

Using your headset : making and receiving calls

Your headset supports both Hands-free and Headset Profiles. Accessing call functions depends upon which profile your phone supports. See your phone's user's guide for more information.

Note: some features are phone/network dependent.

Function	Action
Answer a call	Open the boom or tap the call button (if boom is ready open), hear a low-to-high tone
End a call	Tap the Call button, and hear a high-to-low tone
Reject a call	Press and hold either Volume button until you hear a tone
Redial last call	Press and hold the Call button until you hear a tone
Make a voice dial call (Primary phone)	Tap the Call button and speak the name after the tone
Make a voice dial call (Secondary phone)	Tap the Call button and either Volume button and speak the name after the tone
Answer a second incoming call	Press and hold the Call button (places first call on hold), and hear a tone
Reject second incoming call	Press and hold either Volume button until you hear a tone
Transfer a call from the headset to the phone	Press both Volume buttons and Call button, and hear a descending tone
Mute or unmute a call	Tap both Volume buttons until you hear a mute tone

Indicator lights

With No Charger Plugged In

Headset Indicator	Headset Statuts
Off	Power off
3 blue flashes	Powering on/off
Steady blue	Pairing mode
Quick blue/purple flashes	Pairing successful
Quick blue flash	Incoming call on primary phone
Quick purple flash	Incoming call on secondary phone
Slow blue pulse	Connected (on a call)
Slow blue flash	Standby (not on a call)
Red flash	Idle (not connected to phone)
Slow purple pulse	Connected call muted
Quick red flash	Low battery

Note: After 20 minutes on a call or of inactivity, the light stops flashing to conserve power, but the headset remains on. To disable the indicator light, press and hold both Volume buttons while turning headset on.

Note : Set your primary and secondary phones to different ring tones to know which phone is ringing when wearing the headset.

With the Charger Plugged In To Travel Charger

Headset Indicator	Headset Status
Red	Battery level less than 50% charge
Yellow	Battery level above 50% charge
Green	Charging complete

With the Headset Plugged In to Desktop Charger

Headset Indicator	Headset Status
Red	Battery level below than 50% charge
Yellow	Battery level above 50% charge
Green	Charging complete
Quick blue flash	Incoming call on primary phone
Quick purple flash	Incoming call on secondary phone

Audio tones

Audio Tone	Headset Status
Ring tone	Incoming call
Short tone	Phone network not available
High to low tone	End call
1 short tone when pressing Volume button during a call	Volume at minimum or maximum
Ascending tone	Mute enabled
Low tone (repeated every 15 seconds)	Mute reminder
Descending tone	Mute disabled
Low to high tone	Connection confirmation/voice activation
No audio indications; deteriorating quality	Out of range
2 tones repeated every minute	Low battery

Troubleshooting

My headset will not enter pairing mode

Make sure that any devices previously paired with the headset are turned off. If the indicator light is flashing in blue, first turn off the other device, then close and reopen the headset boom. The indicator light becomes steadily lit in blue indicating the headset is now in pairing mode.

My headset will not pair with my phone

Open the boom flip. Press and hold both Volume buttons and the Call button for more than 10 seconds. The indicator light flashes blue 3 times and then becomes steadily lit. The headset is now in pairing mode to complete the pairing process.

My phone doesn't find my headset

Make sure the indicator light on your headset is on (lit in blue) and steady when your phone is searching for devices.

My headset worked before but now it's not working

Make sure your phone is on and the Bluetooth feature is turned on in your phone.If the Bluetooth feature was turned off or was turned on only temporarily, you may need to restart the Bluetooth feature and pair your phone and headset again.

If you have any additional questions, please call your hotline number (0870-9010-555) or visit us at www.hellomoto.com.
